CHILDREN'S CLOTHING & EQUIPMENT SALE PRICING

Pricing can be tricky - a good rule-of-thumb for ALL types of items is to price them at a third or a half of what you paid for it when you bought it. This will vary according to brand name, availability and condition. Items in original packaging, new items, never used items, and items with a high cute factor can be priced higher.

Always ask yourself "what would I pay for this item?" and keep in mind, if you don't want to bring much back home after the sale, the cheaper the better, especially with clothing.

Here is a list that we hope will assist you in pricing items, and again these are just guidelines. You can also post questions on the Facebook sale page; other sellers can share their experience too!

CLOTHING
